Project Proposal

Question /needs:

Looking for drugs and where come from, between 2005 to 2021??

We can extract some information about world drugs production from seized drugs numbers.

There is lots of factors, which can sway numbers on each side such as government drug tolerance act.

But if we look on overall number, we can extract some basic information.

What each continent offers?

Afrika-home of opioids, but we can find here some cannabis too.

Asia-If you look for alternative drugs Asia will provide you with unknown.

Data description:

Dataset I obtained from https://www.kaggle.com/ramjasmaurya/drug-seizues-annually-since-1970s/code in which the data have been obtained from using tool analysis that was used to analysis Drug Seizures annually since 1970s

seizures of drugs from 1970s to pre covid period

Tools:

I will be planning to use deep learning model and library of Numby – Pandas – Sklearn – Matloltlip -Seaporn – Python
